Affinity® 4 Birthing Bed
The revolutionary birthing bed designed for ease and safety.
The only birthing bed you’ll need.

The Affinity® 4 Birthing Bed

The Affinity® 4 birthing bed creates an inviting and clinically efficient labour and delivery environment.
In labour and delivery, every second counts. You must be able to respond quickly and easily, especially in an emergency. The Affinity® 4 birthing bed delivers on the promise of a safe, sleek birthing bed that functions in the busiest environment with ease.

With the Affinity® 4 birthing bed, we have made dozens of quality improvements, large and small, from dual-locking castors to stronger calf supports.

Our birthing bed is the perfect combination of safety and ease-of-use

At a glance:

EASE OF USE
- Battery back-up
- Zero transfer gap
- Easy to use gas-assist Trend mechanism
- OneStep® side rail release
- OneStep® calf supports

SAFETY FOR PATIENTS AND CAREGIVERS
- Stronger EasyGlide® calf supports
- Four dual-locking castors to keep the bed securely in place
- Comfortline® mattress with pressure reducing foam
- Automatic pelvic tilt to reduce patient migration
- Clean perimeter around the bed with no protruding pieces
- Ergonomically designed lift-off section
No more searching for a power source. **Battery backup** allows the bed features to be used even when you’re away from an outlet.
The Affinity® 4 bed is designed to make every movement fast and easy

**Less time, less hassle**

In labour and delivery, staff time is at a premium. No one can spare even a few minutes to search for equipment, look for an outlet, or use complicated controls. The Affinity® 4 bed is designed to reduce the hassles you face every day.

- **With battery back-up**, you can use all the bed’s features, including changing height and position, when you’re away from an outlet, reducing the time from “decision to incision” in critical situations.
- **The gas-assist Trend mechanism** allows head elevation to immediately lower to 8 degrees.
- **OneStep® side rail release** provides zero transfer gap for safer and easier patient transfers.
- The bed’s **streamlined design**, with all the equipment stored completely within the perimeter (instead of protruding out), protects you as you move quickly around your patient.
- **Automatic pelvic tilt** and optional v-cut mattress provide better access to patient for birth.

Hill-Rom
A HILLENBRAND INDUSTRY
The Affinity® 4 bed brings dozens of safety features to the bedside

Safety and convenience
We have designed every detail of the Affinity® 4 birthing bed to help make the birthing experience safer for you and your patient.

- The foot section locks firmly and easily in position.
- EasyGlide® calf supports swing into the correct position and lock with a single lever, staying firmly in place.
- A robust Trend mechanism, with improved springs and seals, makes lowering and lifting an easy, one-person job.

- Inflatable air pillows in back and seat decrease the need to reposition the patient for delivery.
- Four dual-lock castors keep the bed in place.
- The thicker, pressure-reducing Comfortline® foam mattress provides extra support, especially in the vulnerable seat area.

Patient-friendly grips and side rails make it easier for patients to get up and moving.

Automatic pelvic tilt to 15 degrees helps keep the patient in place during labour and improves positioning during birth.

The lift-off foot section is lightweight and easy to handle, and the foot section stores on a built-in stand.
OneStep® calf supports are larger, with a strong release lever that can be actuated from any angle with one hand.
Affinity® 4 Birthing Bed

For over 75 years, Hill-Rom has served the care environment. In a recent study*, nine out of ten facilities report having a Hill-Rom birthing bed. That kind of experience makes a difference. It's the Hill-Rom difference.
